

# Lidar Ceilometer CL61

with depolarization measurement

Vaisala Ceilometer CL61 is a high-performance light detection and ranging (LiDAR) instrument with depolarization measurement capable of unattended operation 24/7 in all conditions. The depolarization measurement enables differentiation between solid, liquid, or mixed-phase clouds and precipitation, providing ready-to-use information for atmospheric characterization.

## Improved decision-making with more detailed view of atmospheric conditions

CL61 uses attenuated backscatter profiles measured in 2 polarization directions to calculate the depolarization ratio. The depolarization measurement not only enables the liquid/solid differentiation, but also makes it possible to detect dust and volcanic ash.

To further enhance atmospheric structure reporting, CL61 has an improved signal-to-noise ratio (SNR). The improved high-resolution attenuated backscatter profiling is available for the full range, up to 15.4 km (9.6 mi).

With these enhanced features and BL-View software, you also get a detailed view of atmospheric conditions within the planetary boundary layer, for example, for air quality forecasting.

## Leading technology

CL61 contains the latest technology from the world-leading manufacturer with strong experience in lidar technology since the 1980s. There is an installed base of thousands of Vaisala ceilometers worldwide.

Vaisala's unique and proven single-lens technology guarantees reliable measurements in low altitudes.

The new patented transmitter technology in CL61 minimizes the effect of water vapor absorption.

Single-receiver depolarization measurement does not require field calibration.

## Portable and versatile data

Measurement data is available in the universal and accessible netCDF format, making data sharing easy with colleagues and other users.

The system is able to internally buffer data in order to smooth out brief communication inconsistencies. Data is labeled with time, based on a clock synced using Network Time Protocol.

## Easy installation and maintenance

CL61 is a compact and eye-safe lidar ceilometer with modern communication and network capabilities. The modular structure enables safe and easy installation by 1 person.

The product has low maintenance requirements, with extensive self-diagnostics and embedded fault analysis minimizing downtime. Remote Ethernet access reduces the need for site visits and interruption of measurement data flow. These benefits contribute to overall low cost of ownership.

Integrated security software keeps your instrument and data safe.

### Features

- Depolarization measurement to support liquid/solid differentiation, as well as detection of potential dust and volcanic ash
- Attenuated backscatter profiling for the full range of up to 15.4 km (9.6 mi)
- Improved signal-to-noise ratio (SNR) for enhanced atmospheric structure reporting
- Unique single-lens optics with excellent performance also at low altitudes
- Patented technology to minimize the effect of water vapor absorption
- Measurement data available in netCDF format
- Traceable factory calibration

# Technical data

## Measurement performance

Measurement range, cloud and backscatter	0 ... 15 400 m (0 ... 50 500 ft)
Reporting resolution	4.8 m (15.7 ft)
Measurement interval	5 s
Measurement accuracy against hard target	±5 m (16.4 ft)
Laser	InGaAs diode
Laser wavelength	910.55 nm

## Data reporting

Atmospheric parameters	Cloud base heights (up to 5 layers) Cloud depth and penetration <sup>1)</sup> Precipitation/fog detection <sup>1)</sup> Sky condition <sup>1)</sup>
Atmospheric profiles	Attenuated backscatter profile Parallel and cross-polarized profiles Depolarization ratio profile
Status information	Internal monitoring data

<sup>1)</sup> Available later.

## Inputs and outputs

Operating voltage	100 / 115 / 230 V AC ±10 %
Overvoltage category	CAT III
Operating frequency	45 ... 65 Hz
Data interface	Ethernet (> 10 Mbit/s)
Maintenance interface	Ethernet
Message format	netCDF
<b>Power consumption</b>	
With heating	Max. 370 W
Without heating	Max. 100 W
Backup battery (optional) <sup>1)</sup>	12 V DC / 5 Ah, > 1 hour of operation

<sup>1)</sup> Available later.

## Mechanical specifications

Dimensions (H × W × L)	1400 × 420 × 512 mm (55.12 × 16.54 × 20.16 in)
Weight, total	55 kg (121 lb)
Weight, radiation shield	23 kg (51 lb)
Weight, interface unit	12 kg (26 lb)
Weight, measurement unit	20 kg (44 lb)
Material	Aluminum
Color	White (RAL9003)
Coating	Multi-layer coating to prevent environmental corrosion
Tilt angle	Default: 3°

CL61 dimensions

## Operating environment

IP rating (when inside radiation shield, excluding window blower)	IP66
Operating temperature	-55 ... +60 °C (-67 ... +140 °F)
Storage temperature	-55 ... +60 °C (-67 ... +140 °F)
Operating humidity	0 ... 100 %RH
Wind	Up to 60 m/s (134 mph)

## Compliance

EMC immunity	EN 61326-1, industrial environment
EMC emissions	CISPR 32 / EN 55032, Class B
Electrical safety	IEC / EN / UL / CSA 61010-1
Compliance marks	CE, UKCA
Eye safety	Class 1M IEC / EN 60825-1
Complies with ICAO frangibility requirements. <sup>1)</sup>	

<sup>1)</sup> Available later.
